Dashboard

OIC Practice Pit: Virtual Options Trading Simulator

The Dashboard is your home screen and your account admin home base. It gives you a snapshot of your portfolio's performance and a look at your open trades, so you can see which are going your way and which may need your attention. Use the profile icon to change your theme and click the question mark on any page if you have questions.

What you're looking at

1. **Portfolio Figures:** Portfolio Value, Total P&L since inception, and Total Return % on your initial capital. These three numbers are the headline read on account health.
2. **Portfolio Statistics:** Available Cash, Average Daily P&L, Best Day / Worst Day, Capital Utilization (with a Healthy / Moderate / Tight liquidity label), and counts of Open and Closed positions.
3. **Recent Open Positions:** Your four most recently opened trades, with strategy, legs, cost basis, current value, and unrealized P&L at a glance.

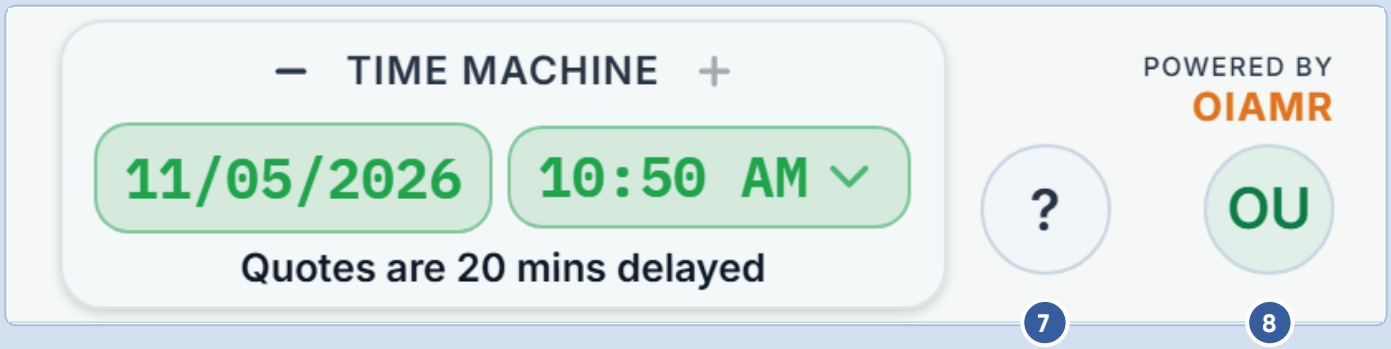

What you can do here

4. Click **Performance Chart** or **Daily P&L** to jump straight into the Portfolio's P&L History view.
5. Click **New Trade** to open the New Position form and log a trade.
6. Click **View all** or any row in Recent Open Positions to open the full Positions list for that trade.

Things to keep in mind

- Capital Utilization tells you how much of your buying power is deployed. A “Tight” label is a cue to review open risk before adding new trades.
- The dashboard stat tiles refresh with the market clock, so intraday P&L reflects live pricing during trading hours.

Account administration

7 **Need help?** Click the ? button in the top right corner of any page to open a help panel that explains what you’re looking at and what you can do on that screen.

8 **Light or dark mode:** Click your profile icon (the circle in the top right corner) to open the Theme menu. Choose Light, Dark, or System to match your device’s setting, and use Log Out from the same menu when you’re done.
